# What to do, if your browser can't play the truehouse stream

Just follow these steps to make your browser rock, in this example with the Chrome Browser.
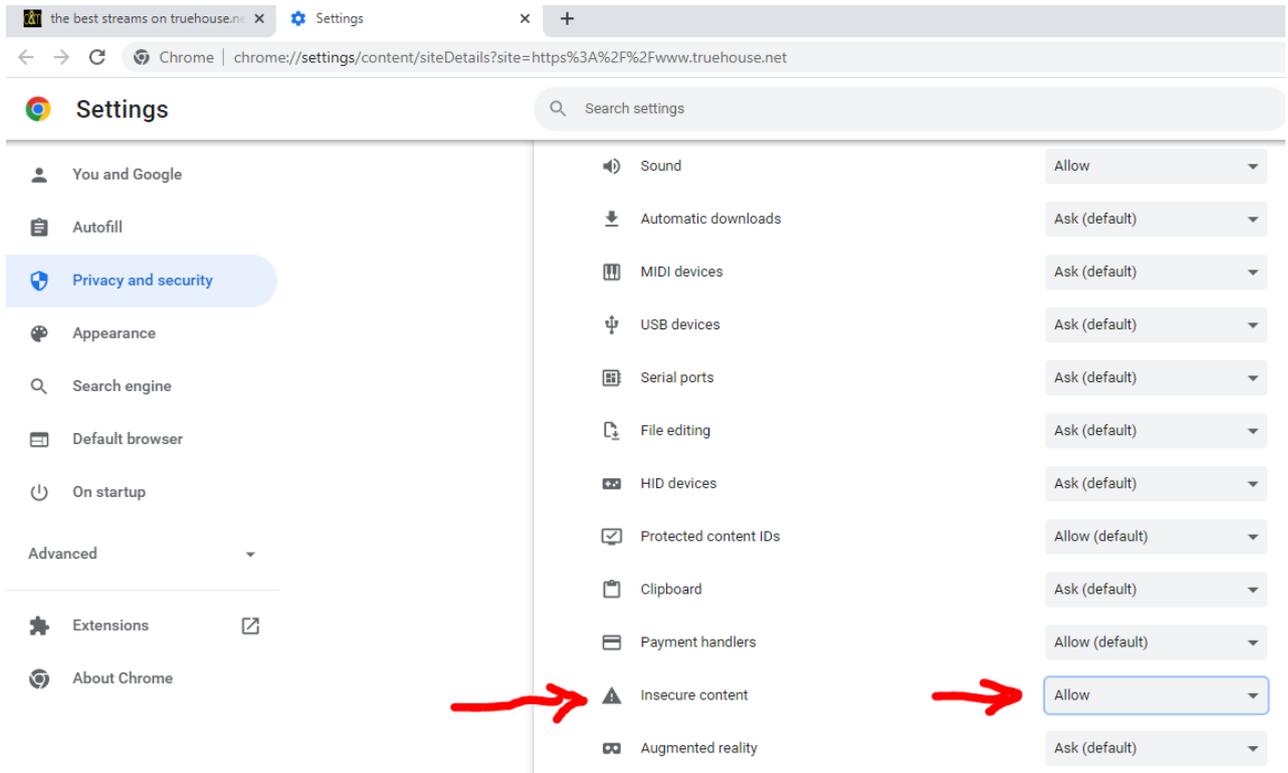

Click on the «key» button and view site information

Klick on «Site settings»

Scroll down the right frame , until you find the title «Insecure content» and change the parameter from «Block» to «Allow»

Close the «Settings» Tap on your browser and press the «Reload» button

Navigate to the stream channel of your choice and press the play button… voilà… the music starts to play and you can listen to the stream now ☺ !
