

Ooops no PLAYLIST here !

we are sorry, we do not have a playlist for this mixshow.

there could be various reasons why we haven't written down a list with tunes for this mix:

maybe we were mixing live and were too drunk for it, or we have forgotten to give the soundfiles correct names while we converted it from outta space cause aliens have taken over our bodies, or, even worse, we had the correct playlist on paper, but then we had a window open and the wind blew in and threw down the candle next to the playlist and burned the entire paper ...

however, you see, we just don't have it.

just enjoy the mixshow !

and if you hear a tune on it, and you really really need to know what it is, because if you don't, you have to die ... try the shazam app on the fruit computer, maybe this can help.
